{wish list}

If you would like to make Molecular better, implement something from this wishlist. Thank you very much!

Services

- molecular-zipkin Zipkin uploader
- molecular-slack Slack service
- molecular-twitter Twitter service
- molecular-stripe Stripe service
- molecular-request Axios-based HTTP client
- molecular-mailchimp Mailchimp API
- molecular-markdown Markdown to HTML converter
- molecular-npm NPM API
- molecular-openweather OpenWeather API
- molecular-process Execute child process
- molecular-sys SSH client service
- molecular-forecast Forecast.io service
- molecular-github Github API
- molecular-jimp Image manipulator with Jimp
- molecular-agenda Task scheduler with agenda
- molecular-template Renders templates with consolidate

Database-adapters

- molecular-db-adapter-rethinkdb RethinkDB adapter for Molecular-DB

Key-value store services

- molecular-store-memory Memory storage
- molecular-store-couchdb CouchDB storage
- molecular-store-couchbase Couchbase storage
- molecular-store-redis Redis storage
- molecular-store-dynamodb AWS DynamoDB storage

icebob added Help wanted Easy - Low Status: Available Type: Enhancement labels on Sep 14, 2017

veacks commented on Jan 11, 2018 • edited

will certainly take `molecular-couchbase` :)
starting on my repo and give you some advice when I have something decent.

1

icebob commented on Jan 11, 2018 Member Author

@veacks Great, good idea.

icebob commented on Jan 24, 2018 Member Author

@veacks Any updates?

veacks commented on Jan 24, 2018 • edited

I've started by forking Molecular-Mongo tests and have written some funcs, but quite full with my client ATM.
Early next month will have more time for it.

Supporting #214 Open

Ankur-Jat commented on Mar 10, 2018

Maybe a novice query, but may I know what do you want in "molecular-twitter" service? I'm interested to make this one. Thanks.

icebob commented on Mar 11, 2018 Member Author

Thanks **@Ankur-Jat** . I think we can implement search tweets, post tweets, retweets, get user profile, get user tweets...etc. And anything else what would be useful.

molobala commented on Apr 4, 2018 Contributor

What about sometimbler like `molecular-flyerjse` like this library ?

molobala commented on Apr 4, 2018 Contributor

I will try molecular-jimp, even if I have never tried jimp before I think it will be an occasion to experiment it

zlovesuki commented on Apr 5, 2018 Contributor

I would want to have something like `molecular-sharp` (with Docker support of course). `sharp` is so much faster (it's native dll): http://sharp.pixelplumbing.com/en/stable/performance/

icebob commented on Apr 5, 2018 Member Author

@molobala Great, if you need help, just touch me.
@zlovesuki Good idea.

molobala commented on Apr 20, 2018 Contributor

@icebob can you take a look at this molecular-flyerjse

ardeejd commented on May 21, 2018

I'll take molecular-slack.

1

ZeroMacduff commented on Jun 17, 2018

I think, we can help you with a few projects. But, I don't quite understand the requirements here.

Eg: why do we need an Image manipulator for micro service framework. And redis support is already there?

icebob commented on Jun 17, 2018 Member Author

Great!
There are no requirements, it's just a list of ideas if somebody wants to help to make more modules to Molecular :)
Currently Redis works as transporter. You can't use it to store values as a key-value store.
The plan is to create a common molecular-store service (a simple key-value store service), which has adapters like (redis, couchdb, mongo...etc)

e7mmEbazaab commented on Jul 18, 2018

@icebob
please , add **molecular-oneSignal** to wishlist for push notifications

alsuhrome commented on Aug 13, 2018

@icebob
Will https://github.com/alsuhrome/molecular-markdown be a candidate for your wish list?

1

icebob commented on Aug 14, 2018 Member Author

@alsuhrome thanks. It's very nice. I will add it to the modules list

designtendrel commented on Oct 13, 2018 • edited

@icebob I just started on https://github.com/designtendrel/molecular-vault. Still very early stage, but will ping when feature-set adds value

1

icebob commented on Oct 13, 2018 Member Author

@designtendrel very great job! Congratulation & thanks! I added it to Molecular site.

1

designtendrel commented on Oct 14, 2018

@icebob https://github.com/Dexyon/molecular-mailchimp-service is an antivirus scanning service. It exposes an action which either scans a file (or part of it) sent to it via multipart stream and returns a JSON response (which behind the scenes I have added an example web app which shows how to do the full stack uploading, rest, qs, antivirus, and even client hooks) in separate components. Possibly antivirus and rest is a useful thing for plugging around modularly whatever. Thoughts?

2

icebob commented on Oct 14, 2018 Member Author

Wow, great idea. And it uses the new Streaming feature :)
Thanks! I also added it to the site.

1

icebob commented on Oct 14, 2018 Member Author

@designtendrel please add "moleculer" tag for your repos so that Github topic search can find them.

designtendrel commented on Oct 14, 2018

done

EmbraceeEG commented on Nov 28, 2018

@icebob
I created https://github.com/EmbraceeEmpire/molecular-mailchimp-service, a middleware to check that a request have the mailchimp signature (an example is in the README). I don't know if middlewares are part of your Wishlist but it can be useful for other people :)
The idea was to have something like https://github.com/MichielDeMey/express-jwt-permissions.

I tested it on really simple cases, but I plan to add some tests soon! Anyway if anything looks wrong or weird, don't hesitate to ping me 😊

icebob commented on Nov 29, 2018 Member Author

Thanks **@EmbraceeEG**, good job. Please push it to awesome repo

1

AndreMaz commented on Nov 29, 2018 Member

@icebob I've already added **@EmbraceeEG**'s repo

cantecim commented on Jan 20, 2019 • edited

Hello, **@icebob** want to add rethinkdb to your wishlist? I need to use rethinkdb in my current project so decided to create an adapter. I would like to ping when it's done if you consider that is a good thing. 👍

https://github.com/cantecim/molecular-db-rethinkdb

1

icebob commented on Jan 21, 2019 Member Author

Thanks **@cantecim**, it would be awesome! Could you use the `molecular-db-adapter-rethinkdb` name to follow the naming conventions of adapters?

cantecim commented on Jan 24, 2019

@icebob first version published as molecular-db-adapter-rethinkdb. Happy coding!

1 1

icebob commented on Jan 25, 2019 Member Author

@cantecim Great! Thank you. I've added here: https://molecular-services/modules.html#databases
And **@AndreMaz** has added to awesome list: https://github.com/molecules/awesome-molecules#databases-and-stores

cantecim commented on Jan 25, 2019

@icebob Thank you guys for making this great framework possible! You forgot to mark wishlist item

no greeter service molecular/molecular-realworld-example-app#4 Unset

cuyoadarius commented on Feb 28, 2019

@icebob
Hi, I had the pleasure of working with this framework for the past few days and I'm enjoying it so far. Coming from express, I miss having access to a context in an action (with express I was using a middleware to add a context to the request object). I've implemented a small middleware to mitigate this: https://github.com/cuyoadarius/moleculer-ctx Maybe it will be helpful for others also.

1

icebob commented on Mar 1, 2019 Member Author

Great lib, thank you. Please add "moleculer" tag to the repo tags.
@AndreMaz please add it to the awesome repo, as well.

2

AndreMaz commented on Mar 3, 2019 Member

@icebob done

intech commented on Oct 31, 2019 Contributor

Remote encryption connection for repl
`moleculer-cli connect repl:/tp:port secretkey`

1

danielsuchyer commented on Jun 10

Id be great to be able to listen for events in the CLI! I couldn't find the functionality and would love to be able to debug our setup using it.

2

manchuwook commented on Jun 24 • edited

- It would be nice to have a typescript version of this. It feels like hasn't moved beyond ES5 and OpenAPI dropped support for it, favoring ES6.
  - Typescript can transpile to whatever depending on need. My job doesn't have Nodejs v12+ support yet, so I'm stuck without ES6, but want to write in it now so I don't have headache later.
  - TypeORM is super fidgety about ES5 but it is the only good way I have to connect to an (Enterprise) Oracle server.
- An OpenAPI generator would be pretty cool, too. Otherwise, I have to generate it for Express then port over the http verbs manually.

devalexandre commented 20 days ago

for `molecular-store-redis` , have use cluster module?? I get start it :)

JaimeCardenas176 commented 12 days ago

can anyone help me with some info so i can kick of something like this 3?

- molecular-npm NPM API
- molecular-openweather OpenWeather API
- molecular-process - Execute child process
